

Several years ago I discovered that my 5-year-old was repeating/singing songs with words and meanings that were appalling. We now listen to Airl - 88.7fm and it has made such a difference in our lives. We are all so much happier and truly blessed by this radio station. Now my 8-year-old sings songs that are positive and uplifting. We need to provide our communities with music like this to listen to. I truly believe that music can affect people's attitudes and every aspect of their lives. I would be lost without this radio station and our community would be greatly affected without this positive alternative on the radio.
